We have launched the **Observatory Specializing in Child Trafficking** in order to:

- Note trends and patterns
- Establish guidelines for the proper identification and monitoring of said trends, and
- Teach professionals to provide focused, specialized care.

In addition, we have conducted:

- Information, awareness, and prevention campaigns for the general public, educational communities, law enforcement agencies, health, the media, and social services;
- Training for professionals in the social sector (social work, education, social integration, etc.), the Public Prosecutor's Office, O16, Samur Social, etc.;
- Studies and publications about human trafficking and sexual exploitation;
- Cooperative projects and direct work with the victims' countries of origin;
- Political and social advocacy work to promote and protect the rights of human trafficking victims...

We thank you for your support, which allows us to work on behalf of victims of human trafficking and sexual exploitation, creating a fairer society for all people.
